

Corners and Borders

Full Collection

After we created the collection Napkin Corners a few months ago we decided to take the concept a step further and create larger corners that are perfect for Napkins, Table Cloths and Centerpieces. This is a design collection that started as a project used in our Embroidery Parties. We wanted to create a project that demonstrated how to embroider on a napkin without any fancy hooping or stabilizer tricks. The project turned into a collection after we saw how excited everyone got when they discovered how easy it was. This collection contains 15 different themes that can be used as corners only for napkins or using the corners with side borders for table runners and table cloths.
