

Nativity 2012

20 Tiles in 4 sizes

Full Collection

About 5 years ago we created our first Nativity Tile Scene. Since then we have had multiple requests to create another version. We gave this collection to a different artist to draw. The end result is an entirely different scene using the same subject matter. We used brighter fabrics for this collection and changed the perspective of the drawing to create larger characters and stable. We also wanted the scene to look like it was floating on a background with a flowing border. The end result is amazing!
